

addressee's address. The return receipt postcard 13 also has a document control number bar code 24 to aid in tracking of the article 14.

---

Please replace the twenty-sixth paragraph of the "DETAILED DESCRIPTION OF THE PRESENTLY PREFERRED EMBODIMENTS" as follows:

---

Referring now to Figures 10-12, an alternate embodiment of a mailing assembly 200 is generally illustrated. The assembly 200 incorporates a first layer 202 and a second layer 204 with an adhesive 206 in selected areas therebetween as generally illustrated in Figures 11 and 12. The first layer 202 of the mailing assembly 200 includes a return postcard 208 with an incorporated designator section 210. At each end of the return postcard 208 are anchor portions 212, 214 separable by perforated tear lines 216, 217, respectively. On a back side of each of the anchor portions 212, 214 is the adhesive 206. The adhesive 206 provides for attachment of the first layer 202 to the second layer 204 and following removal of the first layer 202 from the second layer 204, the adhesive 206 beneath the anchor portions 212, 214 allows for attachment of the first layer 202 to a mailpiece. An auxiliary label 218 is provided exterior to the anchor portion 212 and has the adhesive 206 on its back side. As a result, the auxiliary label 218 may be implemented as described with references to Figures 7-9.
